Mr. Del Rio,

I received your letter, dated April 1, and with an initial review have similar comments as the first letter the District provided, particularly with respect to the need for a drainage report to delineate regulatory floodplains. Attached are examples of other submittals by mining operations. A couple of drainage reports are on this email and I will send some construction drawing in a subsequent email.

I think it is a good idea to meet to discuss the project and will be happy to meet regularly to discuss flood control matters as they arise. I think a meeting in the near future, before work has commenced, will be helpful for the District to understand the phasing and the relevancy to any required permitting.

When would be a good time for you to meet?

Eric Shepp, P.E.

Deputy Director and Floodplain Administrator

Pima County Regional Flood Control District

520-724-4610
